Anukool Tiwari

Product | AI Practitioner | Mission-Driven Problem Solver
Netherlands

Summary

I am experienced in leading customer-facing digital products across e-commerce, retail (Point-Of-Sale) and mobile applications in global B2C environments. I specialise in owning end-to-end product areas from discovery and roadmap definition to backlog prioritisation, sprint execution and measurable growth outcomes. I focus on improving product practices and ways of working to enable more effective and scalable product teams. Recent impact:

- Increased conversion on a global D2C e-commerce platform
- Improved operational efficiency via unified Point of Sale transformation across EU markets
- Led MACH(Headless) migration to improve scalability, speed, and platform governance
- Built and scaled connected mobile apps(IOT) with strong adoption and high customer satisfaction

I operate as a hands-on, within cross-functional Scrum teams, running product discovery workshops on problem definition, ideation, prototyping, go to market, roadmapping and product delivery using backlog refinement, sprint planning, reviews.

Experience

Product Initium

Career Break | Building AI Products & Mentoring Early Career Product Managers

2026 - Present (less than a year)

Amsterdam

Took an intentional career break to contribute to the product community whilst also deepen my expertise in applied AI and hands-on product building via AI tools.

- Mentoring aspiring & early career product managers through my platform - Product Initium, supporting practical learning and career growth
- Designing and launching AI-powered applications from discovery to deployment
- Experimenting with LLM-driven workflows and rapid prototyping
- Strengthening skills in AI-assisted product development and experimentation

Miele X

Senior Product Manager - Ecommerce

2022 - 2025 (3 years)

Amsterdam Area

Led a cross-functional product team to improve the end-to-end D2C e-commerce journey, delivering customer-facing features that increased conversion, average order value, and customer satisfaction across global markets.

Owned the product roadmap and backlog, drove continuous discovery and experimentation. Collaborated with Engineering, UX, Marketing and Analytics to successfully migrate/rollout the platform to a headless MACH architecture.

PVH Corp.

Product Lead - Point of Sale - Retail checkout

2021 - 2022 (1 year)

Amsterdam Area

Improved operational efficiency and store associate satisfaction across EU markets by driving migration & rollout of a legacy Point of Sale system to a unified in-store platform for Tommy Hilfiger and Calvin Klein.

Owned the product vision, roadmap and backlog.

Delivered core retail capabilities while partnering with cross-functional teams and external vendors to scale rollout, drive innovation (mobile POS, RFID) and support a seamless omnichannel experience.

Philips

7 years

Product Manager - New Ventures

2020 - 2021 (1 year)

Amsterdam

Led early-stage product discovery for new venture opportunities, guiding a cross-functional team through research, ideation, rapid prototyping, and validation.

Translated customer insights into compelling value propositions and business cases, successfully advancing two concepts to senior stakeholders for further development.

Senior Product Owner at Personal health, Philips

2019 - 2020 (1 year)

The Randstad, Netherlands

Managed the full product lifecycle for two connected consumer products, leading discovery, roadmap execution, launch, and continuous improvement. Led two Scrum teams to build mobile applications integrated with WiFi- and Bluetooth-enabled devices, collaborating across engineering, design, and marketing to deliver scalable architecture and data-driven user engagement.

Works council member

2019 - 2020 (1 year)

Amsterdam

Promoting and protecting employee interests within the company

- Ensuring that employee interests are represented and safeguarded in all company matters.
- Holding the right to prior consultation in the event of major organizational decisions or measures.

Product Owner - Personal care in Philips

2016 - 2019 (3 years)

The Randstad, Netherlands

Led digital product development and go-to-market for the Skincare business within a cross-functional innovation incubator, delivering multiple releases from roadmap definition to post-launch optimization.

Owned the product backlog and prioritization (WSJF), drove analytics and A/B testing initiatives and partnered with engineering, marketing, and stakeholders to align strategy, execution, and performance outcomes.

Development Lead and System Architect

2014 - 2016 (2 years)

Bengaluru

Led the development and delivery of enterprise-grade Android applications, overseeing the product lifecycle from concept to release and ensuring scalable, user-centric solutions.

Partnered with enterprise architects and stakeholders to drive architectural decisions, streamline Agile delivery, and implement engineering best practices that improved quality and release efficiency.

Altimetrik

Development Lead

2013 - 2014 (1 year)

Bangalore

Partnered closely with Product to translate roadmap priorities into executable delivery plans, ensuring alignment, transparency, and timely execution. Provided architectural oversight, technical direction, and incident governance while cultivating a culture of ownership, scalability, and continuous improvement.

Infosys Technologies Ltd

Senior Software Engineer - Developer mobile apps

2009 - 2012 (3 years)

Bengaluru

Designed and developed enterprise-grade mobile applications across Windows, BlackBerry, and Android, ensuring platform consistency, performance, and usability.

Drove technical innovation through knowledge-sharing initiatives and close collaboration with cross-functional teams.

Education

Dhirubhai Ambani Institute of Information and Communication Technology

Bachelor of Technology - BTech, Computer Science · (2005 - 2009)
